WORK EXPERIENCE

WebTech Solutions

Apr. 2020 – Present

Full Stack Software Engineer

Chicago, IL

A leading tech company specializing in web applications and digital solutions.

- Utilized tools like Postman and Swagger to develop and optimize RESTful APIs, achieving a 40% reduction in response times over a 6-month project period.
- Led a 6-month front-end redesign using React and Redux, boosting user engagement by 30% through improved UI/UX design.
- Implemented automated testing using Selenium and Jest, leading to a 50% reduction in bug reports and enhancing product reliability within 3 months.
- Optimize existing front-end code to reduce load times further and improve overall site performance for end-users.
- Enhanced checkout security and performance by integrating third-party payment APIs, resulting in a 15% increase in transaction success rate

DevStart Inc.

Jun. 2018 – Mar. 2020

Software Developer

Indianapolis, IN

A startup focused on innovative software development and digital transformation.

- Developed scalable web applications using React and Node.js to meet diverse client requirements and improve user experience.
- Collaborated with cross-functional teams to enhance application functionality by incorporating user feedback and iterating on design solutions.
- Optimized data storage and access on AWS, Azure, and Google Cloud platforms, resulting in enhanced performance and cost-efficiency.
